

CERTIFICATE OF ANALYSIS 128745

Client:

Asbestos Reporting NSW

PO Box 1358

Nowra

NSW 2541

Attention: Neil Wallace

Sample log in details:

Your Reference:	<u>90 Junction Street Nowra NSW</u>
No. of samples:	3 Materials
Date samples received:	29/05/2015
Date completed instructions received:	29/05/2015

Analysis Details:

Please refer to the following pages for results and methodology summary.

Samples were analysed as received from the client. Results relate specifically to the samples as received.

Note, even after disintegration it can be difficult to detect the presence of asbestos in some asbestos containing bulk materials using PLM and dispersion staining. This is due to the low grade or small length or diameter of the asbestos fibres present in the material, or to the fact that very fine fibres have been distributed intimately throughout the materials. Vinyl/asbestos floor tiles, some asbestos containing epoxy resins and some ore samples are examples of these types of material, which are difficult to analyse.

Report Details:

Date results requested by:	2/06/15
Date of Preliminary Report:	Not Issued
Issue Date:	2/06/15

NATA accreditation number 2901. This document shall not be reproduced except in full.

Accredited for compliance with ISO/IEC 17025. **Tests not covered by NATA are denoted with *.**

Results Approved By:

Asbestos was analysed by Approved Identifier:	Lulu Guo
Asbestos was authorised by Approved Signatory:	Lulu Guo
